The application for subscription is binding. Incomplete or incorrect subscription forms may be disregarded. No changes or additions can be made to the pre-printed text.

The Rights Issue to subscribe for new shares is not, directly or indirectly, directed at shareholders or other investors domiciled in Australia, Canada, Hong Kong, Japan, New Zealand, Singapore, South Africa, or with certain exceptions, USA, or in any other country whose participation would require additional prospectuses, registration or measures other than those pursuant to Swedish law. The prospectus, application form or other documents associated with the Rights Issue may not be distributed in or to any country where such distribution or the Rights Issue would require such actions set forth in the preceding sentence or be in violation of the regulations of such country. Should such distribution occur, subscription forms sent from such jurisdiction may be disregarded.

No new shares, interim shares, subscription rights or other securities issued by Enzymatica have been or will be registered under the U.S. Securities Act of 1933, or under any other securities legislation in any state of the USA. Accordingly, no new shares, interim shares, subscription rights or other securities issued by Enzymatica may be transferred or offered for sale in the USA, other than in such exceptional cases that do not require registration. The securities included in the Rights Issue will not be offered to the public in the USA.

By signing this subscription form I/we confirm that I/we have read and understood the information stated above and that I/we am/are not a person referred to there or acting for the account or benefit of such person. Furthermore, by signing this subscription form I/we consent to personal data being processed to the extent neccessary for the performance of tasks hereunder.

I/we hereby authorize Skandinaviska Enskilda Banken AB to subscribe for new shares on my/our behalf in accordance with the terms and conditions set forth in the prospectus.
